

A Level Subject and Stream Recommendations: 02

Based on your test responses, we recommend you consider pursuing the Science stream for your Advanced Levels. Here are the subjects that you can choose in this stream:

1. **Mathematics:** Mathematics is an essential subject for science and maths students, as it provides a foundation for understanding a wide range of scientific and mathematical concepts. It is also a useful subject for students who are interested in pursuing a career in engineering, finance, or research.
2. **Physics:** Physics is a fundamental subject for science and maths students, as it provides an understanding of the laws of nature and how they govern the behavior of matter and energy. It is also a useful subject for students who are interested in pursuing a career in engineering, research, or technology.
3. **Chemistry:** Chemistry is another important subject for science and maths students, as it provides a foundation for understanding the properties and behavior of matter. It is also a useful subject for students who are interested in pursuing a career in medicine, research, or technology.
4. **ICT:** ICT stands for Information and Communication Technology. It is a subject that covers a broad range of technologies used for communication, information processing, and data management. This includes computers, software, networks, and the Internet. The subject also covers the social, ethical, and economic implications of these technologies.
5. **Biology:** Biology is the study of living organisms and their interactions with each other and their environment. It covers a wide range of topics, including genetics, ecology, physiology, and evolution.

You may choose any of the 3 subjects from the provided list. Additionally, it is mandatory that you also sit for the General English and Common General tests.
